Providing the Quality Tools You Need and Can Rely On to Get the Results you Expect

Hoefer has consistently brought high quality and reliable equipment, instrumentation, and consumables to meet and exceed the demands of the most discerning scientists. With budgets getting tighter and timelines shorter, it has become increasingly crucial to eliminate the delays and waste caused by inferior equipment.

Since Hoefer brought electrophoresis to the world in 1967, we continue to develop the tools and innovations that are giving scientists the edge they need in this increasingly competitive world. Our expertise and years of experience allow us to provide the best solutions for the most demanding applications.

- The world's fastest and easiest 2D Electrophoresis—Superior quality 2D gels the first time and every time (pages 3-6)
- High Throughput nucleic acid analysis—SUBHT (pages 52-53)
- Intelligent Semi-Dry Blotting units that take much of the guesswork out of blotting—TE70XP or TE77XP (page 58)
- A large range of vertical and horizontal electrophoresis solutions to meet every application and budget (pages 7-55)
- A complete offering of Auxiliary Electrophoresis products that ensure you get the results you expect (pages 130-143)

We look forward to partnering with you for all of your electrophoresis needs and thank you in advance for your support.
